This book examines how child protection law has been shaped by the transition to late modernity and how it copes with the ever-changing concept of risk. The book traces the evolution of the contemporary child protection system through historical changes, assessing the factors that have influenced the development of legal responses to abuse over a 130-year period. It does so by focussing on the Republic of Ireland where child protection has become emblematic of wider social change. The work draws on a

wide range of primary and secondary sources including legislation, case law and official and media reports of child protection inquiries. It also utilises insights developed through an extensive examination of parliamentary debates on child protection matters. These materials are assessed through the lens of critical discourse analysis to explore the relationship between law, social policy and social theory as they effect child protection. While the book utilises primarily Irish sources, this multidisciplinary approach ensures the argument has international applicability. The book will be a valuable resource for all those with an interest in the development of child protection law. This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published chronologically. In 1880, Darwin published *On The Power of Movement in Plants*, and began writing his final book, *The Formation of Vegetable Mould through the Action of Worms*. He was engaged in controversy with Samuel Butler, following publication of his last book, *Erasmus Darwin*. At the end of the year, he succeeded in raising support for a Civil List pension for Alfred Russel Wallace, co-discoverer of the theory of natural selection. With the end of apartheid rule in South Africa and the ongoing economic crisis in Zimbabwe, the border between these Southern African countries has become one of the busiest inland ports of entry in the world. As border crossers wait for clearance, crime, violence, and illegal entries have become rampant. Francis Musoni observes that border jumping has become a way of life for many of those who live on both sides of the Limpopo River and he explores the reasons for this, including searches for better paying jobs and access to food and clothing at affordable prices. Musoni sets these actions into a framework of illegality. He considers how countries have failed to secure their borders, why passports are denied to travelers, and how border jumping has become a phenomenon with a long history, especially in Africa. Musoni emphasizes cross-border travelers' active participation in the making of this history and how clandestine mobility has

presented opportunity and creative possibilities for those who are willing to take the risk. This is the fascinating social history of a remote chiefdom in Zimbabwe. The book focuses on the religion and politics of the area, describing how the Hwesa people adapted the Christianity that the missionaries brought to found their own popular Christianity, pitted against local notions of evil. It also examines the role of the chief, challenging the idea that they were no more than colonial stooges.

Key Features*Original and perceptive writing from a prominent Africanist historian*Fresh body of new data, challenging conventional wisdom

These resources have been created for the Cambridge IGCSE® and O Level Additional Mathematics syllabuses (0606/4037), for first examination from 2020. This coursebook gives clear explanations of new mathematical concepts followed by exercises. This allows students to practise the skills required and gain the confidence to apply them. Classroom discussion exercises and extra challenge questions have been designed to deepen students' understanding and stimulate interest in Mathematics. Answers to coursebook questions are in the back of the book.

The Kentucky Wildcats are the winningest program ever in the history of college basketball, and The University of Kentucky Basketball Encyclopedia is the most comprehensive book ever assembled on the history of the team. Written in a unique, easy-to-read style that brings to life the exploits of Wildcat teams and players, the book includes details about The Fabulous Five, The Fiddlin' Five, Rupp's Runts, The Unforgettables, Jamal Mashburn, Rex Chapman, Melvin Turpin, Kenny Walker, John Wall, and more. Coaching greats Adolph Rupp, Joe B. Hall, Eddie Sutton, Rick Pitino, Tubby Smith, and John Calipari are also featured, as are each of their seven NCAA championships. This is a must read for all Kentucky basketball fans.

Literature cited in AGRICOLA, Dissertations abstracts international, ERIC, ABI/INFORM, MEDLARS, NTIS, Psychological abstracts, and Sociological abstracts. Selection focuses on education, legal aspects, career aspects, sex differences, lifestyle, and health. Common format (bibliographical information, descriptors, and abstracts) and ERIC subject terms used throughout. Contains order information. Subject, author indexes.

Web Standards: Mastering HTML5, CSS3, and XML provides solutions to the most common web design problems, and gives you a deep understanding of web standards and how they can be implemented to improve your web sites. You

will learn how to develop fully standards-compliant, mobile-friendly, and search engine-optimized web sites that are robust, fast, and easy to update while providing excellent user experience and interoperability. The book covers all major web standards for markup, style sheets, web typography, web syndication, semantic annotations, and accessibility. This edition has been fully updated with the latest in web standards, including the finalized HTML5 vocabulary and the full list of CSS3 properties. Web Standards: Mastering HTML5, CSS3, and XML is also a comprehensive guide to current and future standards for the World Wide Web, demonstrating the implementation of new technologies to address the constantly growing user expectations. Web Standards: Mastering HTML5, CSS3, and XML presents step-by-step guides based on solid design principles and best practices, and shows the most common web development tools and web design frameworks. You will master HTML5 and its XML serialization, XHTML5, the new structuring and multimedia elements, the most important HTML5 APIs, and understand the standardization process of HTML 5.1, HTML 5.2, and future HTML5 versions. Thesis (D.P.H.)--University of Michigan. Outside of scientific journals, archaeologists are depicted as searching for lost cities and mystical artifacts in news reports, television, video games, and movies like Indiana Jones or The Mummy. This fantastical image has little to do with day-to-day science, yet it is deeply connected to why people are fascinated by the ancient past. By exploring the development of archaeology, this book helps us understand what archaeology is and why it matters. In Spooky Archaeology author Jeb J. Card follows a trail of clues left by adventurers and professional archaeologists that guides the reader through haunted museums, mysterious hieroglyphic inscriptions, fragments of a lost continent that never existed, and deep into an investigation of magic and murder. Card unveils how and why archaeology continues to mystify and why there is an ongoing fascination with exotic artifacts and eerie practices.
