Kill the Radio Nov 03 2020 "Herliany's poetry is intent upon opposing personal and political oppression. She does not attempt to mend, her poetry does not offer a vision of a final Utopia. Instead, it takes the first step towards change by waking, inciting, shattering." (Poet, Annie Kantar.).

Topics in Phonological Theory Jan 05 2021 Topics in Phonological Theory is a six-chapter text that provides an explication of some of the most important problems in phonological theory, with a few, necessarily tentative, solutions. The first chapter deals with the problem of abstractness in terms of a series of successively weaker constraints that might be placed on the relationship between the underlying and phonetic representations of a morpheme. The second chapter begins with a discussion of the various ways in which the phonetic basis of a rule may be lost in the course of historical change, which lays the groundwork for a lengthy survey of the types of grammatical and lexical conditions that may control the application of a phonological rule. The third chapter describes the constraints and conditions on phonological representations, particularly the domain of these constraints, the level at which they hold, and their duplication of phonological rules. The fourth chapter examines the problem of natural rule interactions, focusing on Kiparsky's theories of maximal utilization and opacity-transparency and their deficiencies. The fifth chapter deals with Chomsky and Halle's simultaneous application principle as well as with more recent proposals. The sixth chapter compares the relative merits of global rules versus rule ordering for the description of opaque rule interactions. This book is intended primarily for linguistics.

The Onomasticon Apr 08 2021 The translation of Eusebius' *Onomasticon*, prepared for the first time in English by G.S.P. Freeman-Grenville, follows the edition of Erich Klostermann. It includes also the Latin rendering (or expanded version) of the *Onomasticon*, made by Jerome sixty years later, known as the *Liber Locorum*. By comparing the two works we can see how Christian Palestine developed between the early 320s and the late 380s. Also included is an annotated index, assembled by Rupert L. Chapman, and two excurses dealing with the precise ways in which Eusebius defines locations

by careful use of Greek prepositions, and also how distances were reckoned in the work.

The Utopia Experiment Oct 14 2021 As read on BBC Radio 4's Book of the Week. Imagine you have survived an apocalypse. Civilization as you knew it is no more. What will life be like and how will you cope? In 2006, Dylan Evans set out to answer these questions. He left his job in a high-tech robotics lab, moved to the Scottish Highlands and founded a community called The Utopia Experiment. There, together with an eclectic assortment of volunteers, he tried to live out a scenario of global collapse, free from modern technology and comforts. Within a year, Evans found himself detained in a psychiatric hospital, shattered and depressed, trying to figure out what had gone wrong. In *The Utopia Experiment* he tells his own extraordinary story: his frenzied early enthusiasm for this unusual project, the many challenges of post-apocalyptic living, his descent into madness and his gradual recovery. In the process, he learns some hard lessons about himself and about life, and comes to see the modern world he abandoned in a new light. 'A gripping, slow-motion car crash. You can't take your eyes off it' Julian Baggini, *Financial Times* 'It radiates an intense intelligence and a candour that is never less than touching and, sometimes, downright heartrending' *Daily Mail* 'Extraordinary . . . both frightening and compelling' GQ

All That Is Red Jan 25 2020 If you could choose a world without loneliness, without shame, grief, misery, or feeling of any kind, would you, if it also meant that you lost the simple pleasure of a picnic on a sunny day or the joy of falling in love? Would the allure of a comfortable numbness prove too tempting to resist? Could you choose between feeling pain and not feeling anything, ever again? A girl is caught in a world where this choice is fiercely contested. In the cross-fire between the Red and White empires, the feeling and the unfeeling, each bent on the other's destruction, the girl must choose between emotion and oblivion, joining the ranks with the Reds as they fight to resist the Whites, but all the while struggling with her own desperate ambivalence. *All That Is Red* is a story of survival and a journey through the human condition, revealing how the intimate euphoria of pain can sometimes be all we have to remind us that we are alive. Anna Caltabiano is fifteen years old. She was born in British colonial Hong Kong to a Japanese mother and an Italian-American father, before moving to Palo Alto, California; the mecca of futurism. Her writing explores and exposes an adolescent dystopia in which accepted traditions, religions, cultures and communities have been eroded, resulting in a lost generation consumed by social apathy and self-loathing which has found solace through electronic connections. Unsettling, engaging and surprisingly erudite, *All That Is Red* is a remarkably assured debut from an ascending literary star.

*Citizens and the State in Authoritarian Regimes Dec 16 2021 The revival of authoritarianism is one of the most important forces reshaping world politics today. However, not all authoritarians are the same. To examine both resurgence and variation in authoritarian rule, Karrie J. Koesel, Valerie J. Bunce, and Jessica Chen Weiss gather a leading cast of scholars to compare the most powerful autocracies in global politics today: Russia and China. The essays in *Citizens and the State in Authoritarian Regimes* focus on three issues that currently animate debates about these two countries and, more generally, authoritarian political systems. First, how do authoritarian regimes differ from one another, and how do these differences affect regime-society relations? Second, what do citizens think about the authoritarian governments that rule them, and what do they want from their governments? Third, what strategies do authoritarian leaders use to keep citizens and public officials in line and how successful are those strategies in sustaining both the regime and the leader's hold on power? Integrating the most important findings from a now-immense body of research into a coherent comparative analysis of Russia and China, this book will be essential for anyone studying the foundations of contemporary authoritarianism.*

Russian Civil Society: A Critical Assessment Dec 24 2019 A vibrant civil society - characterized by the independently organized activity of people as citizens, undirected by state authority - is an essential support for the development of freedom, democracy, and prosperity. Thus it has been one important indicator of the success of post-communist transitions. This volume undertakes a systematic analysis of the development of civil society in post-Soviet Russia. An introduction and two historical chapters provide background, followed by chapters that analyze the Russian context and consider the roles of the media, business, organized crime, the church, the village, and the Putin administration in shaping the terrain of public life. Eight case studies then illustrate the range and depth of actual citizen organizations in various national and local community settings, and a concluding chapter weighs the findings and distills comparisons and conclusions.
