How to guide on the Merchant Services industry. Indepth sales and marketing techniques to help outside sales people, ISOs, Financial Institutions gain success. I started out learning artwork all the way back at the Brooklyn Museum Art Classes to prepare for and was accepted to the High School of Art & Design in Manhattan. With below average grades but an extremely good artwork portfolio I was accepted into the Cooper Union Institute for three years Certificate Program. When I was noticing the legal age to drink, I applied and was accepted to the S.U.N.Y. Purchase Conservatory of Visual Art. After graduating with a 2.5 G.P.A. I was hired by the Board of Education to teach Chess and Computer Classes. Around the second year of teaching I was notified that a trustee of our family had enough money set aside to pay out a book contract expense. When I went back to school yet again at New Horizons C.L.C. I certified in Office Programs and for some reason or another was able to solve all of these technical problems with finishing a book publishing job. I handed that over to my dad, Sam whom wrote 7 reprinted books full time for three years. I published my first book under my own first name this year, Peter Sloan Teaches How to Draw Cartoons. I had an agreement with many artists over my ten years of academy of art training if I am to write a book on artwork to follow the tradition of many cartoon artists and publish my first book about how to draw the face. Most of my work is computer technical and books about games, but following with my agreement to write my very first book about cartoon portrait artwork. Enjoy reading. P. Sloan The Directory of Corporate Counsel, Fall 2020 Edition remains the only comprehensive source for information on the corporate law departments and practitioners of the companies of the United States and Canada. 2020 Edition: ISBN #9781543810295 Practical advice on getting the most of your internet presence At last! This simple revolutionary book is the first plain-English guide to handling sales and credit card transactions on the World Wide Web. It's designed for businesspeople and "cyberpreneurs" who want to make money on the Internet, not do programming for it. Written at a level everyone can understand, E-Cash answers the pressing questions posed by marketers, Webmasters, and entrepreneurs: In doing business on the Internet, how do we process orders? Accept payments? And make sure that our customers' credit card numbers aren't being ripped off? The authors—who are cutting-edge Web site developers and highly creative marketers—clearly explain how to beat the security bugaboo and succeed at electronic selling. Supported by its own state-of-the-art Web site, this book sorts through the new technologies that have finally made internet commerce feasible, then spells out the issues in non-technical terms. Here is much needed information for businesses on Internet and search engine basics -- various methods of e-sales -- how to organize Web sites to maximize sales -- and where to find e-cash service providers. Readers will also be fired up by profiles of internet sales success stories and an indispensable action plan for getting started: "22 Steps to E-Selling Profits". Only E-Cash reveals how to access the cash register that lurks in every computer. Hundreds of thousands of companies are under the gun to generate profits from their Web sites, and this unique book shows them how to do it. Covering New York, American & regional stock exchanges & international companies. The book covers a decade of work with some of the largest commercial and government agencies around the world in addressing cyber security related to malicious insiders (trusted employees, contractors, and partners). It explores organized crime, terrorist threats, and hackers. It addresses the steps organizations must take to address insider threats at a people, process, and technology level. Today's headlines are littered with news of identity thieves, organized cyber criminals, corporate espionage, nation-state threats, and terrorists. They represent the next wave of security threats but still possess nowhere near the devastating potential of the most insidious threat: the insider. This is not the bored 16-year-old hacker. We are talking about insiders like you and me, trusted employees with access to information - consultants, contractors, partners, visitors, vendors, and cleaning crews. Anyone in an organization's building or networks that possesses some level of trust. * Full coverage of this hot topic for virtually every global 5000 organization, government agency, and individual interested in security. * Brian Contos is the Chief Security Officer for one of the most well known, profitable and respected security software companies in the U.S.—ArcSight.
