This book constitutes the proceedings of the international workshops co-located with the 16th International Conference on Document Analysis and Recognition, ICDAR 2021, held in Lausanne, Switzerland, in September 2021. The total of 59 full and 12 short papers presented in this book were carefully selected from 96 contributions and divided into two volumes. Part I contains 29 full and 4 short papers that stem from the following meetings: ICDAR 2021 Workshop on Graphics Recognition (GREC); ICDAR 2021 Workshop on Camera-Based Document Analysis and Recognition (CBDAR); ICDAR 2021 Workshop on Arabic and Derived Script Analysis and Recognition (ASAR 2021); ICDAR 2021 Workshop on Computational Document Forensics (IWCDF). The main topics of the contributions are document processing; physical and logical layout analysis; text and symbol recognition; handwriting recognition; signature verification and document forensics, and others. This framework document will be used as the guiding document for the creation of construction inspection manual chapters and inspection procedures to support the 10 CFR Part 52 licensing process. This document's purpose is to spell out the Church's understanding of the nature of revelation--the process whereby God communicates with human beings. It touches upon questions about Scripture, tradition, and the teaching authority of the Church. The major concern of the document is to proclaim a Catholic understanding of the Bible as the "word of God." Key elements include: Trinitarian structure, roles of apostles and bishops, and biblical reading in a historical context. "MongoDB and Python" is a cookbook-style text to help Python programmers work with MongoDB. It is full of useful, practical recipes for solving real-world problems ranging from how to do fast geo queries for location-based apps to efficiently indexing your user documents for social-graph lookups to how best to integrate MongoDB with the Pyramid Web framework. Air Force Doctrine Document (AFDD) 3-10, "Force Protection," is the Air Force's operational level doctrinal publication on force protection. Force protection supports the core function of Agile Combat Support, and its supporting capability of "Protect the Force." Protecting Air Force personnel and resources is critical to the Service's ability to perform its mission. Due to the increased lethality of international and domestic threats, it is imperative the Air Force take strong measures to protect our personnel and installations, both at home and abroad. How the Air Force protects its forces is critical to global engagement. An air and space expeditionary task force poised to respond to global taskings within hours must establish the means and will to fully protect its forces. Commanders at all levels must have an effective force protection program. Commanders are responsible for protecting their people and the warfighting resources necessary to perform any military operation. We are obligated by the moral necessity of protecting our Airmen to ensure force protection is a part of Air Force culture. The Air Force must continue to develop and refine doctrine that promotes the most effective way to achieve force protection. Understanding and using this doctrine will help ensure the successful protection of our people and resources. Chapter 1, Force Protection Fundamentals, defines force protection for the Air Force and describes how the Air Force views force protection as compared to the multinational and joint views. It describes the basic features of force protection and provides a description of the military challenges faced by

commanders and Airmen responsible for force protection, the unique perspective they provide, and general procedures that guide their actions. Chapter 2, *Command Responsibilities for Force Protection*, describes command relationships when addressing force protection concerns and illustrates how Air Force forces are presented to a joint force commander as part of the commander of Air Force forces' air and space expeditionary task force. It also shows how these relationships integrate into ongoing operations conducted by other national-level US government agencies and host nation counterparts, and describes legal considerations for force protection. Chapter 3, *Threats and Hazards to the Air Force Mission*, describes the many threats and hazards faced by Air Force personnel and identifies the various levels of threat that exist throughout the range of military operations. It further discusses Department of Defense terrorism threat levels assessed by the Defense Intelligence Agency as well as force protection conditions as used by geographic combatant commanders. It provides a discussion of threat objectives and hazard effects. Chapter 4, *Force Protection Planning*, introduces risk management as a process to assist decision makers in reducing or offsetting risks. It gives an overview of the process; identifies the goals, key aspects, and principle concepts of the process; and provides general guidelines for applying the process. The chapter discusses force protection planning considerations, describing the direct relationship between force protection and risk management. Chapter 5, *The Force Protection Community*, discusses the concepts of integrated defense, emergency management, the critical infrastructure program, and force protection effects.

These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.
