The Practice of Reading Jul 11 2021 The Practice of Reading is a lucid and lively examination of the art of interpreting the novel in the context of recent developments in literary theory and criticism. Believing that reading is - or should be - a pleasurable, creative activity, the authors analyse a range of seven novels from the eighteenth century to the present, focusing upon the experiential dimensions of the reading process. What is the role of the reader? What happens when a novel is read? How far does meaning depend on the reader, and how far on the text? These and other related questions are explored in readings of novels as diverse as Tristram Shandy, Pride and Prejudice, Great Expectations, Daniel Deronda, A Portrait of the Artist as a Young Man, Beckett's Trilogy and Possession. In its insistence upon a return to the practice of close reading, the book represents a timely intervention in current literary debates. An accessible, informative and above all stimulating text for all university and college students of literature.

Cultural-Historical Approaches to Studying Learning and Development Apr 27 2020 This collection of papers examines key ideas in cultural-historical approaches to children's learning and development and the cultural and institutional conditions in which they occur. The collection is given coherence by a focus on the intellectual contributions made by Professor Mariane Hedegaard to understandings of children's learning through the prism of the interplay of society, institution and person. She has significantly shaped the field through her scholarly consideration of foundational concepts and her creative attention to the fields of activity she studies. The book brings together examples of how

these concepts have been employed and developed in a study of learning and development. The collection allows the contributing scholars to reveal their reactions to Hedegaard's contributions in discussions of their own work in the field of children's learning and the conditions in which it occurs.

Any Child Can Read Better Aug 12 2021 Reading, however fundamental the task may seem to everyday life, is a complex process that takes years to master. Yet, learning to read in the early stages is not an overwhelming problem for most children, especially when their classroom learning is coupled with a nurturing home environment in which reading is cherished, and pencil and paper are always available and fun to use. In fact, studies have shown that children score higher in reading if their parents support and encourage them at home. Unfortunately, though many parents want to involve themselves actively in their children's education, very few know just what to do. Now Dr. Harvey S. Wiener, author of the classic *Any Child Can Write*, provides an indispensable guide for parents who want to help their children enter the magic realm of words. In *Any Child Can Read Better*, Second Edition, Dr. Wiener offers practical advice on how to help children make their way through the maze of assignments and exercises related to classroom reading. In this essential book, parents learn how to be "reading helpers" without replacing or superseding the teacher--by supporting a child's reading habits and sharing the pleasures of fiction, poetry, and prose. Home learning parents also will find a wealth of information here. Through comfortable conversation and enjoyable exercises that tap children's native abilities, parents can help their child practice the critical thinking and reading skills that guarantee success in the classroom and beyond. For example, Dr. Wiener explains how exercises such as prereading warm-ups like creating word maps (a visual scheme that represents words and ideas as shapes and connects them) will allow youngsters to create a visual format and context before they begin reading. He shows how pictures from a birthday party can be used to create patterns of meaning by arranging them chronologically to allow the party's "story" to emerge, or how they might be arranged by order of importance--a picture of Beth standing at the door waiting for her friends to arrive could be displayed first, Beth blowing out the birthday cake placed toward the middle of the arrangement, and the pictures of Beth opening her gifts, especially the skates she's been begging for all year, would surely go toward the end of the sequence. Dr. Wiener shows how these activities, and many others, such as writing games, categorizing toys or clothes or favorite foods, and reading journals, will help children draw meaning out of written material. This second edition includes a new chapter describing the benefits of encouraging children to keep a journal of their personal reactions to books, the value of writing in the books they own (underlining, writing in the margins, and making a personal index) and a variety of reading activities to help children interact with writers and their books. Dr. Wiener has also expanded and updated his fascinating discussion of recommended books for children of all ages, complete with plot summaries. Written in simple, accessible prose, *Any Child Can Read Better* offers sensible advice for busy parents concerned with their children's education.

Reading as Democracy in Crisis Jan 17 2022 *Reading as Democracy in Crisis: Interpretation, Theory, History* explores the dialectic between historical conditions and the reading strategies that arise from them. It explores the relationship between

democracies that are perpetually in crisis and the seemingly unlimited freedom of our reading practices.

Humanism, Reading, & English Literature 1430-1530 Aug 20 2019 Wakelin uses new methods and theories in the history of reading to uncover fresh information about the design, ownership, and marginalia of books in a neglected period in English literary history. This is the first book to identify the origins of the humanist tradition in England in the 15th century.

Politics, Culture And Identities In East Asia: Integration And Division Aug 24 2022 This edited book reflects the "yin-yang" of East Asia — the analogy of co-existing "hot and cold" trends in that region. To concentrate only on geopolitical competition and regional "hot spots" will exaggerate, if not misrepresent East Asia as a Hobbesian world.

Nevertheless, geopolitical competition cannot be ignored because a failure of the balance of power and deterrence between China and the United States (and its allies) will destabilise the region. There are four "vectors" in the geopolitics of East Asia: China rising, the United States "rebalancing" to this region, Japan "normalising" as a nation-state and ASEAN emerging as a regional community. The interplay of these four "vectors" will set the trajectory of geopolitics in East Asia. Another focus of this volume is on the politics of identity. The distinctiveness, character and flavour of a group, real or imagined, can be "cool." "Cool" as in being charming and appealing transcends national boundaries. Plurality and diversity of identities and cultures in East Asia can be a celebration of life and humanity. However, xenophobic identities, often based on exclusive race, language, religion and hegemony, and its subsequent politicisation can rend a nation apart. Indeed, the affirmation of one's identity may be at the expense or denial of the identity of "the other." Similarly, the assertion and the intricacy of identity and nationalism in East Asia can also be problematic. However, a person or group can have multiple and different scales of identities. Indeed, identities can be fluid and situational.
