*Geology and Mineral Resource Potential of the Chattanooga 1° X 2° Quadrangle, Tennessee and North Carolina* Sep 08 2020 On the basis of geology and known mineral deposits, five tracts are delineated that are favorable for the occurrence of mineral resources, including metals, industrial minerals, and fuels.

**Messiaen Perspectives 1: Sources and Influences** May 05 2020 Focusing on Messiaen's relation to history - both his own and the history he engendered - the Messiaen Perspectives volumes convey the growing understanding of his deep and varied interconnections with his cultural milieu. Messiaen Perspectives 1: Sources and Influences examines the genesis, sources and cultural pressures that shaped Messiaen's music. Messiaen Perspectives 2: Techniques, Influence and Reception analyses Messiaen's compositional approach and the repercussions of his music. While each book offers a coherent collection in itself, together these complementary volumes elucidate how powerfully Messiaen was embedded in his time and place, and how his music resonates ever more today. Messiaen Perspectives 1: Sources and Influences presents many new primary sources, including discussion of Messiaen's birdsong cahiers, sketch and archival materials for his Prix de Rome entries and war-time Portique, along with performance practice insights and theological inspiration in works as diverse as Visions de l'Amen, Harawi, Timbres-durées and the organ Méditations. The volume places the composer within a broader historical and cultural framework than has previously been attempted, ranging from specific influences to more general contexts. As a centrepiece, the book includes an examination of the impact of one of the greatest influences upon Messiaen, Yvonne Loriod.

**Particles, Sources, And Fields, Volume 1** Jan 31 2020 This classic, the first of three volumes, presents techniques that emphasize the unity of high-energy particle physics with electrodynamics, gravitational theory, and many-particle cooperative phenomena. What emerges is a theory intermediate in position between operator field theory and S-matrix theory, which rejects the dogmas of each and gains thereby a calculational ease and intuitiveness that make it a worthy contender to displace the earlier formulations.

**International Criminal Law, Volume 1: Sources, Subjects and Contents** Nov 10 2020 Volume 1 deals with international crimes. It contains several significant contributions on the theoretical and doctrinal aspects of ICL which precede the five chapters addressing some of the major categories of international crimes. The first two chapters address: the sources and subjects of ICL and its substantive contents. The other five chapters address: Chapter 3: The Crime Against Peace and Aggression (The Crime Against Peace and Aggression: From its Origins to the ICC; The Crime of Aggression and the International Criminal Court); Chapter 4: War Crimes, Crimes Against Humanity & Genocide (Introduction to International Humanitarian Law; Penal Aspects of International Humanitarian Law; Non-International Armed Conflict and Guerilla Warfare; Mercenarism and Contracted Military Services; Customary International Law and Weapons Control; Genocide; Crimes Against Humanity; Overlaps, Gaps, and Ambiguities in Contemporary International Humanitarian Law, Genocide, and Crimes Against Humanity); Chapter 5: Crimes Against Fundamental Human Rights (Slavery, Slave-Related Practices, and Trafficking in Persons; Apartheid; International Prohibition of Torture; The Practice of Torture in the United States: September 11, 2001 to Present); Chapter 6: Crimes of Terror-Violence (International Terrorism; Kidnapping and Hostage Taking; Terrorism Financing; Piracy; International Maritime Navigation and Installations on the High Seas; International Civil Aviation); Chapter 7: Crimes Against Social Interest (International Control of Drugs; Challenges in the Development of International Criminal Law: The Negotiations of the United Nations Convention Against Transnational Organized Crime and the United Nations Convention Against Corruption; Transnational Organized Crime; Corruption of Foreign Public Officials; International Criminal Protection of Cultural Property; Criminalization of Environmental Protection).

**Thermodynamics for Sustainable Management of Natural Resources** Sep 28 2019 This book examines ways of assessing the rational management of nonrenewable resources. Integrating numerous methods, it systematically exposes the strengths of exergy analysis in resources management. Divided into two parts, the first section provides the theoretical background to assessment methods, while the second section provides practical application examples. The topics covered in detail include the theory of exergy cost and thermo-ecological cost, cumulative calculus and life cycle evaluation. This book serves as a valuable resource for researchers looking to investigate a range of advanced thermodynamic assessments of the influence of production processes on the depletion of nonrenewable resources.

**Strategic Human Resource Management: Volume 1** Dec 24 2021 This book provides a comprehensive and up-to-date text in the subject. It seeks to address a wide gap existing in terms of the availability of a book that provides extensive coverage in the field. It aims to provide students in human resource management courses and practising managers with a comprehensive view of essential concepts and techniques in a highly readable and understandable form. This book particularly focuses on practical applications, examples and cases that managers can utilise in gaining insights into the subject in order to carry out their HR-related responsibilities. It focuses on practical applications, examples and cases that will be useful for both students and HR managers. It serves two important purposes: to provide an academically rigorous study, and at the same time, offer comprehensive and user-friendly pedagogy. The case studies cited in the book are from across the globe, including studies from India, and will appeal to a large audience.

**Mineral Resources Economy 1** Mar 27 2022 The constant increase in the consumption of mineral resources, as well as the growing awareness of their exploitation, is causing deep concern within the scientific community. This concern is justified by the fact that the energy transition will increase the pressure on these resources, as renewable energies require an increased and more diversified quantity of mineral materials. This book presents an overview of the exploitation of these mineral resources, where the natural, regulatory and environmental constraints interfere with economic, financial and geopolitical interests. By mobilizing the fields of the humanities, geosciences and engineering, it also analyzes the challenges that the energy transition will encounter, challenges related to the contradictory effects that the acceleration of the extraction of these resources will have on their physical availability, the economies that exploit them and the populations that live off of them

**Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 1** Jul 31 2022 Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volumes 1-4 brings together scientific research and policy issues across various topographical area in Asia to provide a comprehensive overview of the issues facing the region. Sustainable Natural Resources Management in Dynamic Southeast Asia, Volume 1, pulls together regional experts in the field to look specifically at sustainability issues across the region, to see what has been implemented, what the impacts have been, and what other options are available. In the race to be a developed region, many Southeast Asian countries have foregone natural resources through haphazard use. As a result, the people are faced with numerous environmental challenges, particularly deforestation and forest degradation, biodiversity loss and ecosystem degradation, reduction in soil quality, and decreases in the quantity of available water. Community-based forest management is the involvement of local communities in the protection, conservation and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations. When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them, they tend to do so in a more sustainable manner by focusing on the long-term benefits rather than the immediate short-term gains. However, when tenure rights are weak, unclear, or insecure, or offer limited benefits, people are incited in extracting more immediate benefits, resulting in suboptimal forest management and the reduction of carbon stocks. Features case studies that cover issues such as rising levels of deforestation, forest degradation, regional food security, ecosystem degradation, biodiversity loss, conflicts over natural resource use, water management issues, and impacts on local communities Includes contributions from local researchers who are dealing with these issues first hand, and on a daily basis Includes a comparative review on REDD+ implementation in different communities Focuses on sustainability issues across the region

**The Data Model Resource Book, Volume 1** Apr 27 2022 A quick and reliable way to build proven databases for core business functions Industry experts raved about The Data Model Resource Book when it was first published in March 1997 because it provided a simple, cost-effective way to design databases for core business functions. Len Silverston has now revised and updated the hugely

successful 1st Edition, while adding a companion volume to take care of more specific requirements of different businesses. This updated volume provides a common set of data models for specific core functions shared by most businesses like human resources management, accounting, and project management. These models are standardized and are easily replicated by developers looking for ways to make corporate database development more efficient and cost effective. This guide is the perfect complement to The Data Model Resource CD-ROM, which is sold separately and provides the powerful design templates discussed in the book in a ready-to-use electronic format. A free demonstration CD-ROM is available with each copy of the print book to allow you to try before you buy the full CD-ROM.

**Information Resources in Toxicology** Mar 15 2021 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format such as government reports, general interest publications, blogs, and audiovisuals. Explores recent internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics such as laws and regulations, chemical hazard communication resources, careers and professional education, K-12 resources, funding, poison control centers, and patents. Paired with Volume Two, which focuses on global resources, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field.
