A compulsively readable behind-the-scenes memoir that takes readers inside the weddings section of The New York Times--the good, bad, and just plain weird--through the eyes of a young reporter just as she's falling in love herself. Growing up in the south, where tradition reigns supreme, Cate Doty thought about weddings . . . a lot. She catered for them, she attended many, she imagined her own. So, when she moved to New York City in pursuit of love--and to write for The New York Times--she finds her natural home in the wedding section, a first step to her own happily-ever-after, surely. Soon Cate is thrown into the cutthroat world of the metropolitan society pages, experiencing the lengths couples go to have their announcements accepted and the lengths the writers go in fact-checking their stories; the surprising, status-signaling details that matter most to brides and grooms; and the politics of the paper at a time of vast cultural and industry changes. Reporting weekly on couples whose relationships seem enviable--or eye-roll worthy--and dealing with WASPy grandparents and last-minute snafus, Cate is surrounded by love, or what we're told to believe is love. But when she starts to take the leap herself, she begins to ask her own questions about what it means to truly commit... Warm, witty, and keenly observed, *Mergers and Acquisitions* is an enthralling dive into one of society's most esteemed institutions, its creators and subjects, and a young woman's coming-of-age. The veteran television newsman and a Pulitzer Prize-winning journalist report on the do's and don'ts of gathering and writing the news and recall illustrative episodes from their own careers The Public Prints is the first comprehensive study of the role of the earliest American newspapers in the society and culture of the eighteenth century. In the hands of Charles E. Clark, American newspaper publishing becomes a branch of the English world of print in a story that begins in the bustling streets of late seventeenth-century London and moves to the provincial towns of England and across the Atlantic. While Clark's most detailed attention in America is to the three multi-newspaper towns of Boston, New York, and Philadelphia, evidence from Williamsburg, Charleston, and Barbados also contributes to generalizations about the craft and

business of eighteenth-century publishing. Stressing continuing trans-Atlantic connections as well as English origins, Clark argues that the newspapers were a force both for "anglicization" in their attempts to replicate English culture in America and for "Americanization" in creating a fuller awareness of the British-American experience across colonial boundaries. He suggests, finally, that the newspapers' greatest cultural role in provincial America was the creation of a community bound by the celebration of common values and attachments through the shared ritual of reading. This paper examines whether the "soft" information contained in the text of management's quarterly earnings press releases is incrementally informative over the company's reported "hard" earnings news. We use Diction, a textual-analysis program, to extract various dimensions of managerial net optimism from more than 20,000 corporate earnings announcements over the period 1998 to 2006 and document that unanticipated net optimism in managers' language affects announcement period abnormal returns and predicts post-earnings announcement drift. We find that it takes longer for the market to understand the implications of soft information than those of hard information. We also find that the market response varies by firm size, turnover, media and analyst coverage, and the extent to which the standard accounting model captures the underlying economics of the firm. We also show that the second moment of soft

information, the level of certainty in the text, is an important determinant of contemporaneous idiosyncratic volatility, and it predicts future idiosyncratic volatility. This book collects important contributions in behavioral economics and related topics, mainly by Japanese researchers, to provide new perspectives for the future development of economics and behavioral economics. The volume focuses especially on economic studies that examine interactions of multiple agents and/or market phenomena by using behavioral economics models. Reflecting the diverse fields of the editors, the book captures broad influences of behavioral economics on various topics in economics. Those subjects include parental altruism, economic growth and development, the relative and permanent income hypotheses, wealth distribution, asset price bubbles, auctions, search, contracts, personnel management and market efficiency and anomalies in financial markets. The chapter authors have added newly written addenda to the original articles in which they address their own subsequent works, supplementary analyses, detailed information on the underlying data and/or recent literature surveys. This will help readers to further understand recent developments in behavioral economics and related research.
